SUMMARY

Dynamic and results-oriented BTech (CSE) student with hands-on experience in Python, automation, and AI-powered tool development. Skilled in strategic planning, database management, content creation, and quality checks. Proven track record of leading initiatives, collaborating with cross-functional teams, and driving productivity. Active participant in Hackathons and tech events, showcasing a strong passion for innovation, problem-solving, and continuous learning.

EDUCATION

BTech – Computer Science Engineering	ITM University, Kharghar	2024 – Present	9.20 CGPA
12th (HSC) – Divine Jr College, Thane	Mumbai University	2022- 2024	83.00 %
10th (SSC) – Vasant Vihar School, Thane	Mumbai University	2022- 2024	90.20 %

TECHNICAL SKILLS

Programming Languages: C++, Python (Beginner),Java

Web Development: FullStack – MERN

Tools: Git Hub, Canva, MS Excel, Word, Power Point

AI Tools: Chat GPT, No?on, Napkin, Gama, etc.

INTERNSHIPS

1. 12thClass.com – MarkeTng Department

Dec 2024 – Feb 2025

Assisted in strategic planning and marketing campaigns. Conducted quality checks (QC) to ensure content accuracy. Supported database management and report generation. Worked on data validation and optimization. Gained insights into digital marketing operations.

2. Lets Upgrade Skill University

Dec 2024

Contributed to content writing for short-form and long-form videos. Applied creative storytelling techniques to enhance content quality. Supported content validation, optimized digital content accuracy.

3. Konvo AI (Full Stack) & Mescora Studios (Full Stack & Strategic Planning)

Dec 2025 – May2026

4. BluWis – MI & AWS Intern

Developing machine learning pipelines for real-world data processing and predictive modeling, while designing and optimizing data ingestion, preprocessing, and feature engineering workflows to improve data quality and model performance. Focused on enhancing model accuracy through hyperparameter tuning and performance optimization, and leveraged AWS services including S3, Lambda, and EventBridge to build scalable, automated, and event-driven machine learning workflows.

PROJECTS

1. Buildtrack

Link : *Github*

BuildTrack centralizes construction workflows—tracking progress, managing inventory, and enabling real-time collaboration across all stakeholders. ☐ It reduces delays, costs, and miscommunication by replacing fragmented tools with one transparent, role-based platform.

2. Timetable-smartie

Link: [Github](#)

A scheduling and team management platform with AI-powered planning, invite-based onboarding, and employee dashboards for streamlined coordination.  Built using Firebase and modern web tools, with clear project structure, setup guides, and database design for easy deployment and use.

3. Mescora Interiors

Link: [Deployed Link](#)

modern interior design platform created to showcase premium residential and commercial spaces with elegant UI, seamless navigation, and responsive user experience. Built with contemporary web technologies, featuring portfolio management, service showcases, and client-focused design aesthetics for strong brand presence and engagement.

HACKATHONS/ EVENTS PARTICIPATED ON BEHALF OF ITM UNIVERSITY

Mumbai Hacks at ATLAS University, Kurla

Google DevFest at Goregaon Sports Club

LEADERSHIP EXPERIENCE

1. Conducted 3 workshops on Git-GitHub , No code plaatforms
2. Head of Operations at (DSC) Developers Students Club, ITM, Kharghar.
3. Organized Web3 meet up for Mysterium Network Community.
4. Hosted a FIGMA workshop on campus, enhancing students' design skills.
5. Organized a full fledged Hackathon HackX 4.0 Hackathon at NMIMS, Kharghar Campus.
